PROFILE

I am currently a Senior at Clarkson University studying Computer Science. I have a passion for all things computer related and am looking for a job where I can contribute what I have learned, as well as expand my knowledge in a practical “real world” environment.

EXPERIENCE

MapInfo; Troy, NY www.mapinfo.com Summer '05, December '05, Summer '06

At MapInfo, I worked on a team with several other individuals developing an application code named “Grande.” I worked in the QA department and was responsible for creating automated GUI tests in C# that would validate nightly and formal builds. I also spent a good portion of my time writing up bug reports and communicating with trial users concerning their feedback on the application.

Clarkson University Unix Team; Potsdam, NY Fall '05

Throughout the '05-'06 school year, Clarkson underwent a transition from Unix systems (running Solaris) to RedHat linux. My primary job working for the Unix team was to make the transition as seem-less as possible by researching, downloading, and recompiling the vast library of applications for the new i386 architecture. The end result was to make the new system appear and function virtually identically to the old one.

Clarkson University Phoneathon; Potsdam NY School Year '04-'05, '05-'06

As a caller for the Clarkson Phoneathon, I spent two nights a week calling up alumni to answer questions about Clarkson, update them with the “going on’s” of Clarkson life, and to collect donations to the Clarkson University.

North Colonie School District; Latham NY Summer '03 '04 '05

During my first summer at North Colonie, I worked as a janitor preparing and cleaning the various elementary schools for school in the fall. This including waxing floors, painting walls, scrubbing desks, spreading mulch around gardens, and planting flowers.

Purshe Kaplan and Sterling Investments; Albany, NY February - July '03, Summer '04

At PKS, I closely mirrored Mike Gregware who was in charge of the IT department. I did server maintenance, built and rolled out client machines, and occasionally helped in user support. During the summer '04 I did considerable work on the internal and external portions of the www.pksinvest.com website.

Shaker High School; Latham, NY Fall '99 - Spring '03

During the school year, I acted as lighting and sound Co-Chair for Shaker High School’s music program. I was responsible for running lights and sound for the spring musical and fall play, as well as for the various school concerts.

Wilkins Fruit and Fir Farm; Yorktown Heights, NY Summer '99, '00, '01, '02

At Wilkins Fruit and Fir Farm, I was responsible for all kinds of farm labor including mowing, pruning, weeding, bailing hay, and many others. I also spent a considerable amount of time developing the www.wilkinsfarm.com website.

EDUCATION

Clarkson University, Potsdam NY

GPA: 3.25

Major: Computer Science Minors: Information Technology, Business Administration

Hudson Valley Community College, Troy NY

Shaker High School, Latham NY

SKILLS

I am very knowledgeable of most mainstream operating systems including Mac OS X, virtually all versions of Windows, and various distributions of linux including Fedora, Mandriva, and Ubuntu. I have a great deal of experience programming in C++, as well as ANSI C, C#, Java, Scheme, and Prolog. Having designed a number of different websites, I am well versed in HTML, php, and MySQL. I am a quick learner and am always looking to pick up new languages and skills.
